PROFILE

Motivated software engineering undergraduate at South Eastern University of Sri Lanka with strong problem-solving skills and a passion for innovation. Eager to apply knowledge in collaborative projects, contributing to cutting-edge technology and shaping future advancements.

PROJECTS

Simple To-Do List (React.js)

- A basic to-do list application built with React.js, featuring an intuitive user interface where users can add, edit, and delete tasks.
- This project demonstrates fundamental CRUD operations and state management in React

Login and Register Page (Firebase & React)

- A user authentication system built using React and Firebase. The project includes registration, login, and password reset functionalities.
- It showcases my skills in integrating React with Firebase for secure and efficient user management.

Recipe List (API & React)

- An interactive recipe application developed using React, which fetches data from a public API to display a variety of recipes.
- Users can search for recipes and view details, demonstrating my ability to work with APIs and dynamic data rendering in React.
